

Employment

- **Cox Automotive / VinSolutions** Mission, KS
Lead Software Engineer *October 2017 - Present*
 - Lead a development team through building, maintaining and designing features for an industry leading CRM application.
 - Collaborated with product, engineering, architecture and leadership to present valuable solutions to long term projects and immediate concerns.
 - Design stable, secure and scalable Distributed Systems in AWS and on-premise hardware. Developed and promoted learned patterns in the organization.
 - Designed and implemented Disaster Recovery strategy across all teams. Received quarterly Engineering award for effort.
 - Successfully merged two development teams with nearly 100 owned services. Received a quarterly Engineering award for this as well.
 - Achieved exceptional level of quality for the development team, with zero reported production issues in all of 2020.
 - Developed and regularly taught highly rated all-day course on Distributed Systems. Made into a requirement for all levels in engineering.
 - Led a major engineering effort to decouple a piece of legacy functionality cross-organization.
 - Used pub/sub messaging and queuing patterns for resiliency, scalability and availability.
 - Built serverless Docker micro services running in AWS ECS and Fargate.
 - Developed an automated testing framework for test engineers and introduced rollback upon test failure into deployment pipeline.
 - Mentored team members daily through code reviews, 1 on 1s and strong foundation of trust.
 - Actively promoted a culture of excellence in the organization by sharing experience through presentations and documentation.
 - ASP.NET Core Web API back-end, React front-end and SQL Server database.
- **Site 1001** Kansas City, MO
Senior Software Development Engineer *October 2016 - October 2017*
 - Build and maintain a data-driven facility management application aspiring to incorporate AI, Machine Learning and IoT technology.
 - MVC Web Application with Entity Framework, RESTful Web API, Microsoft SQL Server.
 - Client-side application utilized Razor syntax and component-based jQuery.
 - Develop a Mobile application for iOS and Android using Xamarin.
 - Design and implement architectural changes throughout all layers of the application to improve performance and code quality while minimizing technical debt.
 - Mentor and collaborate with a small team of developers in a fast-paced development cycle. Design features and work with various lines of the company to iterate effectively.
 - Developed Windows services to integrate with third party smart sensors and IoT devices.
 - Upgraded enterprise application tools and dependencies: MVC2 to MVC5, .NET Framework 4 to .NET Framework 4.5.2, Web Forms views to Razor views and Visual Studio 2010 to 2017.

- **Bradford & Galt / Heartland Crop Insurance** Overland Park, KS
Software Engineer *November 2015 - October 2016*
 - Design and support systems in a mathematically intensive, enterprise level insurance application in .NET using C# 6.
 - Maintain stored procedures and views in Microsoft SQL Server with NHibernate as the ORM.
 - Set up a specialized unit and regression testing environment using NUnit.
- **Artisan Technology Group / Beyond the Scores** Kansas City, MO
Software Engineer *May 2015 - November 2015*
 - Develop an enterprise application as a greenfield project from the ground up with a team of mostly two developers. Involved in modeling, design, development and architecture.
 - C# .NET 4.5 Windows Presentation Foundation (WPF) following the MVVM pattern.
 - Communicate directly with clients on consulting projects, supporting their products, developing new features, and advising on architectural concerns.
- **PeopleAdmin / Netchemia** Prairie Village, KS
Software Engineer *August 2013 - May 2015*
 - Develop features in C# MVC and VB.NET Web Forms products. Additional technologies included Microsoft SQL Server, AngularJS, JQuery, KnockoutJS and JavaScript.
 - Product Owner, handling issue resolution, delegating, testing, requirements and code review.
 - Work directly with an off-shore team to ensure quality support for the product.
 - Led a cross-organization team of seven to win the first internal company hackathon, establishing a company intranet.

Education

- **Rockhurst University** Kansas City, MO
B.A. in Mathematics and French Language, Philosophy Minor *2008 - 2012*
 - **Rockhurst Outstanding Research Award** (2012)
 - **William A. Luby Mathematics Medal Award**
 - Undergraduate research project published in *Mathematical Spectrum* **48**, 1, 22-29 (2014/2015) entitled *Exploring the New Zealand Puzzle*
 - Competed in the Missouri Collegiate Mathematics Competition
 - Presented at CALHE Conference at Missouri Western State University

Skills

- **Development**

- **Microsoft**
C#, Web API, MVC, Xamarin, WCF, VB.NET, WPF, ASP.NET, Entity Framework, .NET Core, Razor Pages, XAML, Web Forms, XML, PowerShell
- **Amazon**
Elastic Beanstalk, Elastic Container Service, Fargate, SQS, SNS, HashiCorp Terraform
- **Database**
Microsoft SQL Server, PostgreSQL, MongoDB
- **Web**
JavaScript, ReactJS, TypeScript, jQuery, Node.js, Python
- **Agile**
Scrum.org **Professional Scrum Master I** Certification, Kanban
- **Source Control**
Git, TFS, SVN, GitHub, SourceTree
- **Deployment**
AWS, Azure, Heroku, GitHub Pages, Octopus Deploy, Jenkins
- ***nix Technology**
unix, vim, bash, zsh, screen
- **Software**
Adobe Photoshop, Adobe Lightroom, WordPress

- **Hobby**

- snevsky.com/projects: Various personal programming projects.
- snevsky.com/blog: Personal blog, including technology topics.
- photos.snevsky.com: Digital photography.
- music.snevsky.com: Songwriting and music production.
- Collect and play many musical instruments.
- Text editor magic in vim.

- **Language**

- Fluent in English and Russian.
- Conversational in Telugu.
- Novice in French and Tamil.
