

## Employment

- **Site 1001** Kansas City, MO  
*Senior Software Development Engineer* *October 2016 - Present*
  - Build and maintain a data-driven facility management application aspiring to incorporate AI, Machine Learning and IoT technology.
  - MVC Web Application with Entity Framework, RESTful Web API, Microsoft SQL Server and Xamarin Mobile App for iOS. Client-side application utilized Razor syntax and jQuery.
  - Design and implement architectural changes throughout all layers of the application to improve performance and code quality while minimizing technical debt.
  - Mentor and collaborate with a small team of developers in a fast-paced development cycle. Design features and work with various lines of the company to iterate effectively.
  - Developed Windows services to integrate with third party smart sensors and IoT devices.
  - Upgraded enterprise application tools and dependencies: MVC2 to MVC5, .NET Framework 4 to .NET Framework 4.5.2, Web Forms views to Razor views and Visual Studio 2010 to 2017.
- **Bradford & Galt / Heartland Crop Insurance** Overland Park, KS  
*Software Engineer* *November 2015 - October 2016*
  - Design and support systems in a mathematically intensive, enterprise level insurance application in .NET using C# 6.
  - Maintain stored procedures and views in Microsoft SQL Server with NHibernate as the ORM.
  - Set up a specialized unit and regression testing environment using NUnit.
- **Artisan Technology Group / Beyond the Scores** Kansas City, MO  
*Software Engineer* *May 2015 - November 2015*
  - Develop an enterprise application as a greenfield project from the ground up with a team of mostly two developers. Involved in modeling, design, development and architecture.
  - C# .NET 4.5 Windows Presentation Foundation (WPF) following the MVVM pattern.
  - Communicate directly with clients on consulting projects, supporting their products, developing new features, and advising on architectural concerns.
- **PeopleAdmin / Netchemia** Prairie Village, KS  
*Software Engineer* *August 2013 - May 2015*
  - Develop features in C# MVC and VB.NET Web Forms products. Additional technologies included Microsoft SQL Server, AngularJS, JQuery, KnockoutJS and JavaScript.
  - Product Owner, handling issue resolution, delegating, testing, requirements and code review.
  - Work directly with an off-shore team to ensure quality support for the product.
  - Led a cross-organization team of seven to win the first internal company hackathon, establishing a company intranet.
- **Risk & Regulatory Consulting, LLC** Leawood, KS  
*Actuary Analyst* *June 2012 - June 2013*
  - Performed risk-focused financial examinations of insurance companies for state commissioners.
  - Evaluated annual statements, participated in interviews and used mortality tables to audit life insurance companies. Wrote detailed evaluations ultimately sent to the state.
  - Maintained software in APL and Visual Basic to assist in financial valuation.

- **Box Office Analyst** Kansas City, MO
  - *Web Developer* *June 2011 - June 2012*
    - As the sole developer, designed, developed and maintained a company web site using PHP and Microsoft SQL Server from the ground up.

## Education
